
ENDURANCE[®] 
Solid & Secure Composite Doors

**THE PERFECT DOOR
FOR YOUR HOME**

WHY CHOOSE ENDURANCE?

SOLID TIMBER CORE

With a 48mm thick cross-bonded veneered laminated timber door leaf, Endurance Doors deliver lateral strength and unrivalled stability making our doors amongst the most secure on the market.

Homeowners often comment on how secure their new Endurance composite door makes their home feel. It's the first choice in delivering unbeatable security for you and your family, without compromising on style.

MOISTURE BARRIER SYSTEM (MBS)

Each Endurance composite door is manufactured with an integrated Moisture Barrier System in the base of the door leaf. The concealed bonded cellular PVC profile is specifically designed to protect your door against water damage and delamination, giving you extra peace of mind that your composite door will withstand the test of time and the elements.

FOILED COOL SKIN TECHNOLOGY

We use a laminated door skin with a highly weather proof and durable acrylic layer, offering exciting vivid colours and luxurious wood effect designs that perfectly match the door frames into which they are installed.

SECURE YOUR HOME IN STYLE

All Endurance Doors have been subjected to a number of controlled security tests. Even using a sledgehammer, it would prove difficult to break through the door's solid timber core!

£1000 SECURITY GUARANTEE AVAILABLE

Endurance Doors are pleased to announce that we are so confident in the unprecedented level of security offered by the ATK 3 Star Diamond Cylinder that in the unfortunate event a home-owner is broken into by means of snapping the cylinder, Avocet Hardware will offer compensation of £1000.

Terms & Conditions apply. See website for full details.
